Hi, I'm Emre

I am an autodidact developer, having taught myself various new technologies while frequently working with start-ups. I love programming and crave to make a difference in the world. I believe I can add value to your company in reaching its objectives.

Work Experience

Self Employed - Full-stack Developer

February 2021 - February 2022 *12 months* — Turkey - Istanbul/Balat

Developed products for international and local companies as a freelancer. **Some of them are:**

1. A business website and CMS. Created the digital existence of Estefulya, designed the website and the logo, spared extra time on **SEO**, and got great metrics. Everything was working on the **JAMstack** workflow without a back-end.
2. A carbon calculator web app that calculates the greenhouse gas impacts of construction activities. Implemented the company's calculation formulas and created an interface.
3. A mobile Flutter app that I did maintenance. The app interacts with noise canceller headphones via Bluetooth and measures environment sound, applying noise reduction if required. Also, a real-time dashboard that can visualize the headphone behaviors.

> *Outside of my gigs, was learning new technologies and working on my open-source and other projects.*

Bontesoft - Intern, Front-end, Full-stack developer

February 2020 - February 2021 *12 months* — Turkey - Istanbul/Besiktas

I maintained the company's existing SaaS, built an interactive interface for an e-commerce website, and a landing page for a bank, and **completed three MVP apps**. I had always **written the interfaces from scratch**, **exactly as their design**, also **modeled relational databases** and created **REST APIs** with **Node.js**, and implemented **RTC** and **cron schedulers** for some projects.

> *Got two promotion in a short period of time.*

BSM Technical Project - Web Developer

June 2019 - December 2019 *7 months* — Turkey - Istanbul/Sisli

This was a newly founded company in the construction area. I was there from the very beginning and my work was versatile. I had written an admin panel with **JQuery and PHP** that can send offering mails according to the company's stocks and convert approved offers into billings. I had created their website and written the whole content as I can.

> *I had a positive impact on the company's workflow efficiency and finding potential customers.*

Istanbul Cerrahi Hospital - IT Intern

August 2016 - August 2017 *12 months* — Turkey - Istanbul/Nisantası

Worked here to complete my school' internship program. Helped the technical service to increase the efficiency in logistics and inventory management with the programs I've developed in excel, and had become key personnel for the manager.

Education

Dogus University - Software Engineering

August 2019 - Present — Turkey - Istanbul/Acıbadem

Sultanahmet Vocational High School - Information Technologies

September 2013 - June 2017 — Turkey - Istanbul/Sultanahmet

Developed more than 20 websites for my classmates' and other class students' vocational homework projects mostly using HTML, CSS, and JS. Earned a fair amount from each friend and contributed to their grades.

Activities and societies: Joined the theatre club and played the sultan's right hand.

Projects

Lorinto - Social Network Project

2019 November - Present

I want to develop something that current social blog platforms don't have and I believe Lorinto will have a place in the real world in the future.

mavi - Open-source Project

2021 November - Present

This module aims to lift repetitive works that you have made every time building a server from scratch.

Skill Details

I don't feel constrained by tools and welcome using various languages, frameworks, programs, and modules. I am a fast learner and look forward to growing my skills through projects that are purposeful.

Database Certification: MSSQL and SQL

Issued Jun 2016 · No Expiration Date · Credential ID **16064320160046422993** — ISMEK Institute Istanbul

About Me

I was born in Istanbul on 27 February 1999, I am still a student at the Dogus University 3rh grade, always worked all through my college life. I value friendship, being helpful, optimistic, and a reliable person.
